With this new gameplay feature, reactions that were previously impossible to simulate on a player are now possible. Due to the demands of the game, opponents can now tackle you, hold you or perform other actions to make life difficult for you. The FIFA family will play a big role in the development of the game, with the FIFA Caster Kit powered by

MotionMatch© playable on both consoles and mobile. The goal of this kit is to make it easier for players to interact in and around FIFA gameplay, and we're expecting lots of positive feedback on the FIFA Caster Kit. The FIFA Caster Kit is a quick-access menu on the console and mobile versions of the game that allows for common actions to be performed in-game. Both the console and mobile versions feature an Oculus Touch® controller. The viewer is visible on both the console and mobile to make it easier for users to see and interact with the player. There are two user modes, Experimental and Ready, and the actions are divided into four categories: Dribble Glance Change Kick Change Ball (available on mobile only) Dribble: In this user mode, the on-screen view will highlight the user's view of the player's view, meaning you can easily simulate passes and dribbles by using a double tap. Glance: This mode allows the user to directly control the look of the player in-game and works like a 'tilt' control. The look and movement of the player can be controlled intuitively in a similar way to other games that use a virtual reality headset. Kick: By using an easy-to-find button, the user can perform basic kicks, and simulate more complex actions such as quick touches of the ball. In addition, users can use the Oculus Touch controller to practice difficult shots by tapping the target (in the same way you do in real life). Ball: In this user mode, the look and movement of the user are fixed, allowing for advanced moving of the ball by hand. Users can perform simple tricks or dribbles by rapidly moving their hand around the ball. In addition, users can use the Oculus Touch controller to practice difficult shots by tapping the target. FIFA Caster Kit on mobile For mobile users, two game modes are available: full game mode and training mode. Training mode: Users can view the game

Features Key:

- FIFA 22 includes the first ever update of the "this year in review" Mode: The Coach. This is an all-encompassing career mode where players can take their perfect team with them wherever they decide to go. In addition to the new "this year in review" Mode there is the Player Career mode, and some new features are included too, such as propulsion, medicine bottles, speed bonuses, weather and fatigue and goal celebrations.
- FIFA season mode and the all-new "this year in review" mode combined.
- Brand new meaning to the term 'home advantage,' as players can choose between real stadiums and remodeled versions from around the world. The remodeled stadiums will reflect your real-life surroundings, offering alternate atmospheres such as wooden floors and natural ceilings that fit in with the theme. The custom stadiums also boast upgraded kits and on-screen flags to guide your on-pitch action.

-
- FIFA 22 built for FIFA Mobile and FIFA Online Seasons.
 - Sync FIFA Ultimate Team API data between the different platforms for more in-depth competitions.
 - Brand new FIFA Ultimate team cards, blocks and player roles.
 - Brand new context-sensitive cards, blocks and player roles; as well as whole categories.
 - Brand new game mode cards for Ultimate team
 - Additional in-game user interaction features. Players can now share individual gameplay goals, aerial controls, and player ratings from the likes of Kiss Bunt, Futgraph, Statszone and the FIFA Visual Zone.
 - Brand new Animation Engine. With the new animation engine, player likeness are now able to be more natural and life-like during one-on-one, mutual and off-ball action.
 - Brand new Matchday engine. Enhance communication during the match through a real-time chat and visual cues to add atmosphere to the pitch.
 - Added Feelings technology, which allows the player's mood and heart to be tracked throughout the game to affect his performance.
 - Brand new Vision Based Control. The players can now see even the subtleties during one-on-ones, and the AI is better at building around the ball and keeping it in play.
