ASCIIDENT (Astronomical Analogical Commander Interdimensional Entity) is an escape game in the tradition of the literary science fiction. Its realization is a faithful rendition of the images and events presented in the novel. The author himself is not responsible for the content of the game. Like it or hate it, you must determine what is worth keeping to the utmost, and what must be thrown away. Game Features: - Useful items include a telescope, a computer, a frog, coins, gloves, a machine gun and bombs - Interdimensional entities - Puzzles: not linear, and often unexpected - 3 endings - 3 difficulty levels - 3 possible paths to the end - 3 great bonuses: a frog, a machine gun, a telescope - Animated wallpapers in various resolutions - The main section that gives the story line of the novel. - The "one-way travel" mode - to go forward in time, you will need to input the date and time the story is taking place - Save your progress and continue the game at any time - Transparent save and restore - Interior and exterior maps to the game - Arcade physics will make you feel as if you are really in the game ' Wallpaper Awesome November 11th, 2014, 02:03 PM Go deeper, I want to see more. I want to see what happens next. I can't decide if this is an April Fools joke or not. Either way, the graphics look amazing. Super Mech November 11th, 2014, 04:41 PM This is insane. I love it! Super Mech November 11th, 2014, 04:49 PM Never going to get around to playing this, but I just had to do the Wallpaper. Is it me or is the game playable under save as? The game already has the map, so you don't even need a map. Go deeper, I want to see more. I want to see what happens next. I can't decide if this is an April Fools joke or not. Either way, the graphics look amazing. You've got it right: it is an April Fool joke. This is just a public preview of the free version of the game, which will be released on April 1st (tomorrow). Now, you can do three things: - Play the

"Frango Anomaly" opens on an exceptional day. The sun shines, the sky is blue, the wind is blowing and everything is in the perfect condition for a day of solar sailing. A few hours later the mysterious "flying saucer" is spotted by a marine vessel and escorted to the Puerto Serrato (Algalite City of the World). By order of the President of the World the Ascidentian vessels are immediately preparing to meet the UFO. The aliens aboard the "Frango Anomaly" quickly demonstrate their culture: secure the situation, show their IDs and start their communication, inside on Earth. This book is composed of several episodes. Episode 1 - The Gift, episode 2 - The 2 Minutes, episode 3 - Space Simulation and episode 4 - The 722 Hours. During their communication, the aliens give us several reasons why they have come to Planet Earth: They want us to know them. They want contact with us. But that won't happen immediately. They have come to this planet as an act of grace. The communication will be conducted via an artificial intelligence simulation computer program. It will be called the "Searcher" and the knowledge obtained from it will be presented to us via the photographic method, in the form of a wallpaper (like in the movie). The Visitors demand the best as a sign of good manners: that we bring our "best" the information we get. It's not an option to refuse: we have to send them all the information they ask for. The last episode reveals a new aspect of the story: there is a group of Earthlings who tried to make contact with the aliens. They tried to offer a solution to some of the problems that constitute the root cause of the world's current situation. For the aliens the Earth is the worst place for life on the planet. The radiation, land pollution, crowded cities and traffic jams, the sheer waste that produce and the rest of it, are not the source of the real problem. The real problem is that the overall system of Earth is not centered on the spirit of life, the spirit of kindness, the respect for the environment and the encouragement of the recycling system and that there is no way to get the entire planet to go in the right direction. If something like this doesn't happen, then planet Earth will be destroyed. With this book, I want to expose the secrets of the Universe, the unknown technology and the consequences that there are in our lives. About the book d41b202975

### **ASCIIDENT - Science Fiction Novel**

Game mechanics: The player controls the protagonist, who has to move from location to location, enter buildings and encounter with enemies in various forms. The primary goal of the game is to destroy all the creatures that control the human world. There are 4 levels of the game, that each will give the player more difficulties. These levels were built to teach you and get you acquainted with the mechanics of the game. But the game will not be repeated until you defeat the 2nd level. Level 1: 1. Levels 2, 3 and 4 are optional, as the game will be completed, either in less than an hour or at level 5. If you die before the game is over, the game will close with a warning that the game is not over and you can only restart and try again. 2. Each location has 2 levels, so the first level is visible from the balcony or the second from the ground level. As you gain more experience, the game will be accessible from more and more locations. 3. When you enter a building from outside, you need to examine all the levels and determine which one is accessible from the outside. Go down the stairs to the one that is accessible from the exterior. If there are multiple steps, the first step is the main entrance. 4. When you encounter an enemy, it makes sense to examine it. Some of these creatures are common enemies, that you will encounter on all levels. But some are a much more dangerous element that will appear only on certain levels. You will have to determine how to deal with them. 5. The open spaces include levels with platforms on which you can jump to the next location. But do not forget to jump in the correct direction. 6. Often you will encounter bosses, which are more dangerous than the enemy and that you have to defeat them in a special way. 7. The first level is accessible from the first location, the second is accessible from the second location and so on. 8. You can carry out a scientific experiment. However, don't get too close. 9. If you need to examine an object, press the right button and a cross will show up on the ground where you can see it. When the numbers of cross increase, this means that you have to examine the object. Clicking on the object will display the information about it. To access the secrets of the laboratory, you need to collect 10 coins from the area of scientific experiments (3 on the lowest

### **What's new in ASCIIDENT - Science Fiction Novel:**

**ist By Gail Gordon Rottman INTRODUCTION** **Phantoms of Science Fiction is an open-genre mystery centered on a fictional writer--James Greeley--who is suffering from a loss of memory due to a series of bad accidents that involve the Ghostbusters, the Fantastic Four, Ultron, and a homicidal robot. James believes his losses of memory are the result of a phone book cover that was on the bottom of a cabinet drawer. When James gets a gift-wrapped copy of the phone book cover, the "phantoms" appear and show James what happened before his injuries and prevent his memory loss. In the meantime, James becomes convinced that some kind of supernatural force was causing these repeated accidents. To solve his problem, James spends his days having dinner with informants--grouped by their paranormal powers--to determine what has been happening to him. James also becomes convinced that he will be able to escape each "accident" by talking to the right informant. In this novel, James Greeley is the main character and the only person who doesn't need to answer. At the end of the novel, he reminds us of several things: How personality traits inform writing style. How a lifelong love for Sherlock Holmes informs James's style and thinking. How a multiple-occurrence accident can influence our thinking. How the relationships of love and friendship comprise a human being--even if their "BFFs" met in the pages of Science Fiction. THE SETTING** **This novel is written in the same time period as Star Wars and involves paranoia--an age when technology, weapons, and threats are part of the everyday landscape. For example, James has once daydreamed about dancing with Patrick Stewart during a Star Trek convention. While James is healthy at the beginning of the novel, later in the story he has a series of injuries that involve the hero group, the Fantastic Four. I had five living rooms to work in, as I grew up in a bachelor apartment. The SFX editor for this novel was hired in the six months between the first and third editions of this work. SCIENCE FICTION BLUES** **As I wrote this novel, I was reminded of what it was like to be a writer of sci-fi novels. For example, I am a huge fan of either Law & Order or Law & Order (the later versions).**
